Study Guide

This was the first application I created and has allowed me to keep track of what I have learned throughout my bootcamp lessons..

Horiseon-Marketing

This application was a HTML CSS Code Refactory Project

Horiseon

Search Engine Optimization Online Reputation Management Social Media Marketing

Lead Generation

Brand Awareness

Cost Management

The screenshot shows a web browser window for 'travjblack.github.io'. The top navigation bar includes 'Dashboard', 'Search Hotels', 'Search History', 'Convert Currency', 'Future Features', and a notification bell. Below the navigation is a section titled 'International Travel Planner' with a 'Find Hotels!' button. On the left, there's a 'Search for Hotels:' section with two cards: 'Excalibur' (3850 Las Vegas Boulevard South, Las Vegas, NV, USA) and 'Luxor' (3900 Las Vegas Boulevard South, Las Vegas, NV, USA), each with a star rating of 2.5. To the right is a 'Currency Converter' section with three boxes: 'Base Currency: USD' (Exchange Currency: DKK, 4321 USD = 29731.3792263699 DKK), 'Base Currency: USD' (Exchange Currency: AUD, 4321 USD = 6566.8408674106 AUD), and 'Base Currency: USD' (Exchange Currency: PHP, 4321 USD = 244045.9601481673 PHP).

International Travel Planner

First group application using API's, CSS Frameworks, Modals, and Javascript

About me

My name is Alexandra Ruiz. I have worked in companies like Tiktok and Meta where I have experience in Quality assurance focused on Trust and Safety. I have always been interested in the world of coding and web development so I signed up for the UT coding Bootcamp. I hope to document my journey and new projects in this portfolio. When I am not studying or working I love going to the park, going on walks, and traveling!
